## I. Daily\_Meeting\_8

- The use-case diagram was proposed. With a few changes in it, it was ready to be submitted.
- We also discussed on how the frontend design would look like.
- Moreover we discussed solutions to a few questions such as:-

Have you seen similar problems before?

Has a similar problem been solved?

Can subproblems be defined?

Can you represent a solution in a manner that leads to effective implementation?

- Thus, these questions were a subset of the major problem "Plan the solution" in "The Essence of Practice" as suggested by Polya.
