I. Daily_Meeting_10

- We started working on requirement gathering.

- A requirement gathering schedule was required to be created.

- We discussed the questions of requirement gathering.

- The interviews of users had already taken place, so we went through the answers of those questions.

- By analyzing the answers we discussed the changes that could be made in our use case diagram.

- We also discussed few questions that could be asked to stake holders.

  With the above discussions we concluded the meeting.
  The task assigned was to create a requirement gathering schedule.
